Subject: Extension Request - EPA Preliminary Comments on the Baseline Human Health and Ecological Risk Assessments

Jim, per our phone call today, EPA is granting a 14 day extension of the deadline to invoke dispute resolution with regard to EPA's Preliminary Comments on the Baseline Human Health and Ecological Risk Assessments. These comments were submitted to the Lower Willamette Group on December 23, 2009. EPA recognizes that due to the Christmas and New Year holidays, the LWG has not had time to fully review our comments. The new deadline is January 20, 2010.

Please let me know if you have any questions about this request.

Thank you.
